You Can Make More Profit From

That Farm with

Tractor

Eminent authorities estimate conservatively that the average

tractor is the power equivalent of five men and two horses. You

can easily figure the saving in operation - plus the greater advan-

tage of getting your season's work done exactly when it should be

done. It means bigger crops—therefore bigger profit to you.

The owner of a Tractor is not worried about the shortage of la

bor. He cultivates all of the land available and makes it pro-

duce the very maximum. They are today giving perfect satis-

faction under many varied conditions of farm work. The well-

-and an Oliver Plow

He knows that the Oliver Plaw combined with the Tractor

will enable him to set the very maximum of good plowing done. The Oliver is the most widely used Tractor plow—and is backed by the world's largest plow manufacturing organization.

The combined rolling Coulter and Joiners bury all trash at the bettom of the furrow. The stop device ranintains an even depth of furrow. The plow points center and level the ground first making it possible to plow clear out to the ends of the field. There is a further advantage in the simple sope trip

control by which the operator can raise and lower the bottoms from his sent on the tractor.
